

Are your controlled substances accounted for throughout the hospital?

Drug diversion is a known problem that is increasing in healthcare.

Do you have a proactive drug diversion system in place?

Do you know how Pharmacy, Nursing and anesthesia monitor drug diversion?

Are you adhering to JCAHO, state and federal guidelines?

Shouldn't you find out your risk points before you have a major drug diversion?

Is it worth the risk not to find out?

You need a Drug Diversion Analysis

RXinnovate Consulting

Industry leaders in Hospital Drug Diversion Consulting

RXinnovate Consulting, the industry leader in Hospital Drug Diversion Consulting, provides controlled substances risk analysis and action plan development for hospitals. Drug diversion is a known and recognized problem throughout healthcare. Hospitals need to assure controlled substances are accounted for and monitored throughout all steps of the medication use process, from purchasing to patient administration.

RXinnovate utilizes a patented methodology to detect drug diversion in hospitals. We analyze your controlled substance data activity to identify risk points and potential drug diverters. RXinnovate will analyze all controlled substance processes and develop a detailed action plan to reduce/eliminate drug diversion in your hospital.

RXinnovate Consulting will provide your organization with the following:

- ▶ **Ordering, storage, administration and documentation**
We analyze P&P and all processes for controlled substances from ordering, storage, administration, waste and documentation. All processes from Pharmacy through Nursing and Anesthesia
- ▶ **Automation drug diversion analysis**
We analyze 90 days of your automation data to proactively identify users who are diverting controlled substances. We have analyzed over 200 hospitals and found diversion in over 95% of hospitals.
- ▶ **Automation discrepancy analysis**
JCAHO monitors discrepancies greater than 24hrs. The DEA may levy fines up to \$10,000 per occurrence. We will analyze your data and implement processes to assure timely discrepancy resolution.
- ▶ **Risk level determination with drug diversion**
Assess existing practices and determine hospital risk level.
- ▶ **System design and modeling**
We develop site specific system design/modeling to reduce controlled substance drug diversion risk points in the hospital.
- ▶ **Gain control of your system**
We will provide you with the information and tools to measure, monitor and manage controlled substances throughout the hospital.
